

Ajusta-Buckets

Hydraulic Swivels

Effective time-savers provide 45° of hydraulic swivel action to your OEM buckets. Great for ditch cleaning and limited access jobs.

Hydraulic Swivel- Snap-Lock

Our standard swivel (or swinger) provides swivel action along with all the features of our popular Quick-Coupler .

A manual snap-lock mechanism allows fast, secure changes between different buckets and attachments and a manual safety pin prevents accidental release. The hydraulic swivel can be used with any standard OEM bucket or attachment. No special buckets required!

- ◆ Sizes available to fit machines from mini-excavators up to 250,000 lb. excavators.
- ◆ Custom hydraulic installation kits are also available.

Hydraulic Swivel- Pin-On

For applications where buckets or attachments are rarely changed, a sturdy, economical pin-on version of our hydraulic swivel can be provided. One set of adapter pins is included at no additional charge.

Ajusta-Buckets Hydraulic Swivels

- Swivel torque is generated by two opposing hydraulic cylinders in a “V” formation, located between the pin connection areas on the coupler end of the attachment.
- The piston rods are stationary while the cylinder bodies move, causing the torque pins and torque plates to rotate the attachment 45° in each direction.
- Operates on system pilot pressure: 1000 psi, 4 gpm.

Other products

Since 1955, Ajusta-Buckets has been a leader in the design and manufacture of top quality heavy-duty attachments for the construction industry.

In addition to our line of hydraulic swivels, Ajusta-Buckets manufactures :

- ◆ Quick-Couplers: both manual and hydraulic
- ◆ Clamshell Buckets; Digging and Material Handling
- ◆ Custom Couplers and Adapters
- ◆ Buckets, rippers and other ground engaging tools
